

Stedman Machine Company Press Conference to Introduce a New Machine

Stedman Machine Company is having a Press Conference to introduce a new machine Wednesday, April 25, 2018, at 11 am in Booth 1327. An actual full scale model of the new crusher will be on display.

Will you be able to make it? We'll keep it to 1/2 hour and have all the product materials for you there on a flash drive and/or email to you after the event.

This new product is a big announcement for Stedman; it meets many very common size reduction application needs in processing industries. This brand new size reduction machine is designed from the ground up to be easy to maintain. The new crusher will be available for testing in the Stedman Machine Company Testing and Toll Processing Plant after the show.
